Stop Time

As the sight of plastic surgery loving celebrities becomes increasingly common, we are all steadily joining the quest to achieve ever younger looking complexions. If surgery is too scary for you to contemplate, a brand new skin renewal device has hit the market. **Stop** (as in stop the ageing process) is a compact and easy to use handheld device, which reverses the signs of ageing using Tri Polar Radio Frequency.

Stop focuses four low power beams deep into the skin's dermis, stimulating the dermal activity to tighten collagen fibres and increase new collagen production. This activity produces a thicker dermis, thereby reducing fine lines and wrinkles and improving skin texture.

Smoother, more radiant skin is noticeable from the initial treatment and over a period of 4-6 weeks, by repeating the 15 minute treatment twice a week, long lasting effects can be achieved. Clinical studies have shown up to 50% increase in dermal thickening and the appearance of wrinkles reduced by up to 16% and fine lines by 35%, so it seems there's finally a pain free solution for younger looking skin.

Stop is priced at £396.00 and is available at all [Harvey Nichols stores](#).
